Phriendly Phishing

Information Security at Home

When you're at home, you should take precautionary steps to secure your information. Be as vigilant at home as you are at work!

Install the latest software security patches for your apps and operating systems at home.

Don't let your family play on your work devices (laptop, tablet or mobile).
TIP Use a passphrase on your home devices.

Regularly backup your data and photos.

Ensure your home network is secure, especially if you use Wi-Fi.
TIP Install a firewall so bad guys can't gain access to your network.

Make sure your antivirus software is up to date and properly configured.
