

# Vishing

Voice Phishing, also known as Vishing, is quickly growing in popularity. Scammers attempt to get you to react to verbal requests and hand over personal, private, sensitive or valuable data over the phone.

## Protect yourself from a Vishing attack

Always stop and **take your time** to understand what you're being asked to divulge over the phone.

Don't fall for **emotional manipulation tactics**, such as a sense of urgency, sense of authority or sense of curiosity.

Always **verify the legitimacy** of the caller.

Look out for **context and tone** of the call.
